

# Net Lessons

WEB-BASED PROJECTS FOR YOUR CLASSROOM

If you're a teacher or curriculum director looking for easy-to-implement solutions to do your job better, the World Wide Web can help. The Web offers you and your students easy access to the Internet's bounty of educational resources for every grade level and discipline. You can join with classrooms in Japan and Germany to critically examine World War II. Or travel virtually to Paris, view paintings at the Louvre and stop off at a cyber cafe to practice French with native speakers. Or follow the migration of the Humpback whale with other classrooms along its route from the breeding grounds to the feeding banks. The possibilities are endless.

Net Lessons includes everything you need to harness the Web's unique potential as an educational tool. Written by a teacher and curriculum designer, this book offers over seventy classroom tested lesson plans and ideas for using the Web to enhance your existing curriculum, as well as practical implementation plans and assessment tools.
